

# Spotlight

## Unique features

### A) Special Endpoints

#### 1) Get insights of post/reel by media\_id or shortcode :

Use this endpoint to get hidden insights such as save\_count, share\_count, ad\_media, likes, comments, saves, shares from ads, etc

#### 2) Follower Insights:

This endpoint provides Most Active Times graph of followers.

#### 3) Bulk Likes By shortcode or media\_id:

You can fetch upto 9000 likers data in one call. Sometimes this endpoint returns errors if media like count is greater than 10k, in this case you can use "Post/Reel Likes By shortcode" endpoint from Media section.

### B) Nearby Locations

#### 1) Nearby Locations with Filters:

Pass map coordinates to get nearby location data, you can filter locations by category and hashtag.

#### 2) Nearby locations by latitude & longitude:

Just pass latitude and longitude to get nearby locations. The first nearby location endpoint is efficient.

# Search from Followers and Followings

## 1) Search Followers/Followings:

Use Search Follower and Search Following endpoint to search users using username or keyword.
